LinkedIn: https://linkedin.com/in/rachel-t-dev

Education

- BS in Computer Science, University of Central Florida

Experience

- Software Developer, LoopSpace (2021-Present)

- Built and maintained React dashboards for logistics applications

- Integrated third-party APIs with some statistical analysis features

- Frontend Engineer, ClicknShip (2019-2021)

- Developed components with limited backend logic exposure

Projects

- GitHub: https://github.com/rach-tdev

- ChartsPlus: JS charting components using D3 and Chart.js

- ML-Sandbox: Basic regression models with sklearn (heavy use of libraries)

- No mathematical derivations or custom implementations

Strengths

- Strong UI development and integration skills

- Uses math-related tools but lacks mathematical insight or original implementation

- Communicates well with technical and non-technical peers
